### Irish Oats.

A bunch of the above quality was presented to us a few days since, measuring 6 feet 4 1-2 inches in length, said to be a fair specimen of a six acre field on the Rabun's creek plantation of John Garlington, Esq in this district. [We surrender the prize to those oats of the Hamburg Journal, measuring 7 feet 6 inches in height exclusive of the roots, with stalk an inch in diameter, said to have grown in this district—What a pity they were pulled before maturity!
